Associates of science

EXPERIENCE

Busser / hostess / server
Email: Fogo de Chao | Oct 2019 - Apr 2020
Big Al's | Jun 2019 - Oct 2019

Provided great customer service, resolved conflict, and improved processes in fast paced establishments.

PROJECTS

React Slack Clone  
React, Redux, firebase, semantic UI react

Personally developed a full-stack chat application from front to back with React, Redux, Firebase 5, and Semantic UI React. Allows user to communicate between development teams or groups (channels)

Just A Recipe  
React, NodeJS, Express, mongodb, mongoose, Firebase, Spoonacular API, CSS3

A full stack App/Site created in one week sprint, that uses the Spoonacular API to build a recipe site with over 350,000 recipes available for the user. The recipes are able to be called based on name, allergens and dietary preferences.

Let's Talk About It  
React, Node, Express, mongoose, mongodb, Jest, Mailgun, web scrapper, CSS

Full stack app, created in one week sprint.
A backend twitter bot that that helps stop the stigma of mental health by sharing facts and questions to help spark conversation and reflection. It scrapes data about mental health from research papers and websites and then it sends automated tweets for approval via email weekly to the developers team.

Salud!  
React, Node, Cocktail DB API, CSS

Created a full stack app in one week sprint using ReactJS and NodeJS. Salud! is a simple, easy to use app that uses the Cocktail DB API to get access to over 500+ best and latest cocktail recipes. The cocktails are available to be called based on name.

TECH STACK

Web-development:	Databases:	Testing:	Tools:
- Javascript	- mongodb/mongoose	- Jest	- Github
